

GST AND GST AWARENESS IN HARIDWAR

Prepared by: Sudarshan R

Introduction

Goods and Services Tax (GST) is one of the most significant tax reforms in India, introduced in 2017 to replace multiple indirect taxes. It created a unified tax structure and improved transparency. GST eliminated cascading tax effects and simplified compliance. However, awareness among stakeholders remains uneven, especially in semi-urban regions like Haridwar.

Industry Overview

Haridwar is a key economic and religious hub in Uttarakhand, with strong sectors including tourism, retail trade, and MSMEs. GST has impacted these industries by standardizing taxation and introducing digital compliance systems. Small traders often depend on accountants due to complexity.

Literature Review

Various studies indicate that GST awareness among businesses is moderate but lacks depth. Many MSMEs face compliance challenges and rely on external consultants. Research shows GST improved transparency but increased initial compliance burden.

Analysis and Interpretation

The analysis reveals that around 70% respondents have heard about GST, but only 35% understand filing procedures. Awareness is higher among educated respondents. Many businesses report challenges in filing returns and understanding tax slabs.

Findings and Suggestions

The study concludes that awareness exists but is not sufficient for full compliance. Government should conduct awareness programs and simplify GST filing systems. Digital literacy must be improved.

Conclusion

GST has streamlined India's tax system but awareness gaps persist. With better education and support, GST compliance can improve significantly in regions like Haridwar.
